Visitor.Express protects and empowers your workforce, streamlines administration and allows your business to physically implement and proactively evolve your Return-to-the-Workplace strategy. A one-stop shop that allows your employees to manage their own workplace activities, facilities and resources within the levels of administration your business requires.

Functionality Tailored to Your Needs

Developed by NetFM working closely with our clients, Visitor.Express delivers a suite of seamlessly integrated Plug&Play modules, automating many areas of facilities management within a flexible and updateable set of permissions-based rules.

The core Visitor.Express booking, management and reporting engine and each of its dynamic individual modules are highly configurable, allowing you to create a truly bespoke solution to fulfil your own unique workplace requirements, internal policies and business needs. This allows our clients to manage and support constantly evolving strategies, implementing differing policies across multiple sites/buildings and applying varied permissions to bespoke user groups.

Micro-Management with Minimal Admin

Effortlessly control building occupancy, minimise touchpoints, easily maintain social distancing policies and allow employees to manage their home/office work schedules on the go. Regain tight control of the workplace while providing your organisation with the flexibility to evolve and comply with the ever-changing requirements of the new normal workplace.

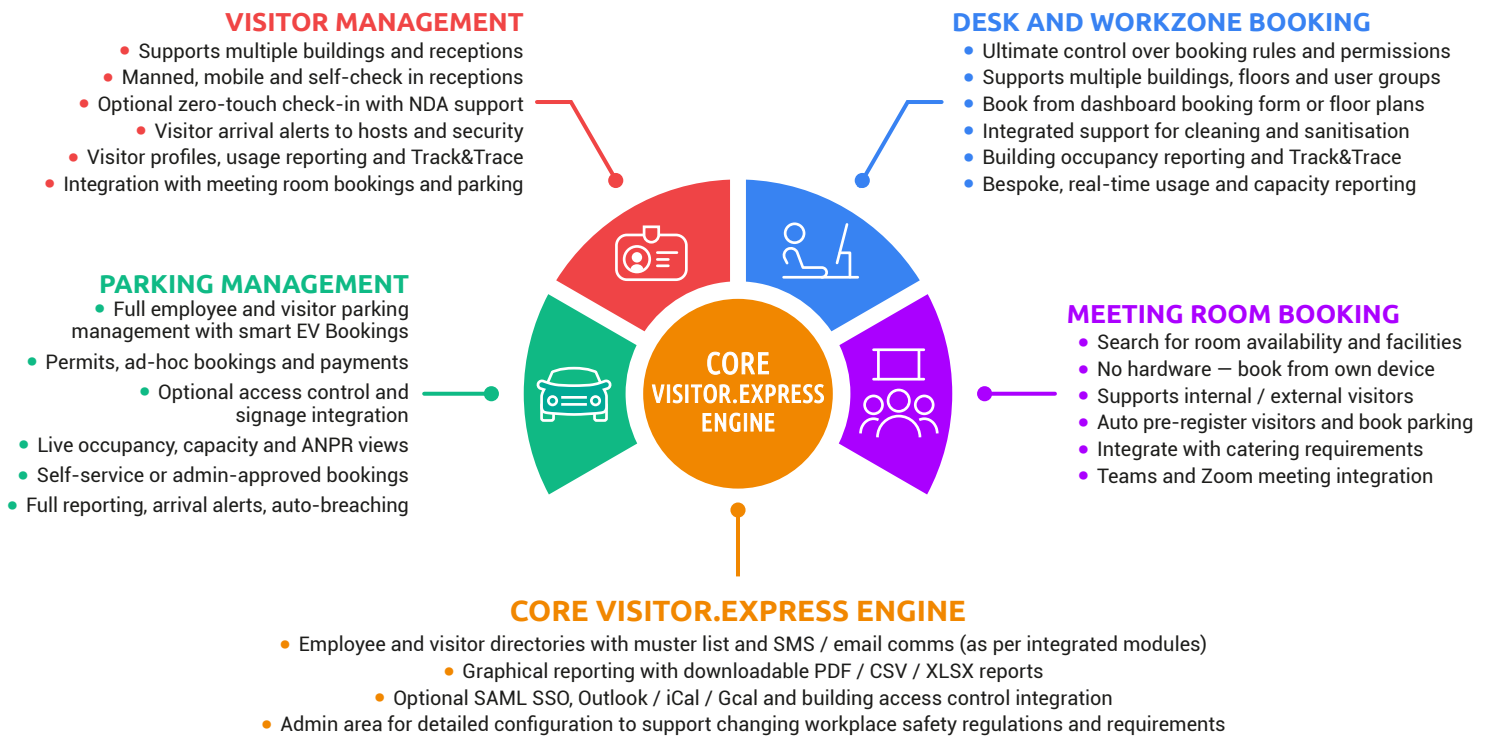

Visitor.Express allows you to demonstrate due diligence and renew confidence in your workforce, visitors and clients – maximising productivity, opportunity and normality within unpredictable times.

NetFM is a trusted UK-based software company

Core Visitor.Express Engine and Integrated Plug&Play Modules

Integrate all or any of Visitor.Express Plug&Play modules to create your own unique workplace management solution. Cost efficient, fully-managed with no mandatory hardware requirements, Visitor.Express is highly configurable to meet almost any facilities management requirement.

NetFM — Trusted, Proven, Experienced

NetFM UK Ltd is an agile software development company with a proven track record in delivering cost-effective software solutions to public sector, SME and blue-chip clients for over 20 years. A strong team of skilled UK-based developers and dedicated account managers, NetFM work closely with a growing client-base to develop innovative systems that fulfil common and bespoke business requirements. Emphasising automation, innovation with great customer service and support, our systems have served over 500,000 users and processed over 10 million bookings and transactions.
